

Catholic Social Teaching

IN OUR CURRICULUM

BUSINESS

CARE FOR CREATION

In Business, we link our curriculum to Catholic Social Teachings through topics such as The Design Mix where we learn about the importance of sustainability in product development.

We teach about the ethical stance that businesses take in terms of environment, supply chains and recruitment. We examine stakeholder responsibilities and the effects of multinational corporations on communities and the environment.

As the environment is an important stakeholder in business – we understand how businesses can make an impact in terms of air pollution, noise pollution and their use of renewable and non renewable energy. We learn about the impact that Multinational Companies have on our planet and the role of CSR (corporate social responsibility) within MNC's.

Live out our faith...
